CONSTRUCTION ENGINEERING AND MANAGEMENT

(New Regulation 2017-2018 & New Syllabus 2018-2019)

Full Marks – 70

Time – Three hours

The figures in the margin indicate full marks
for the questions.

Answer question No. 1 and any *four* from the rest.

1. Choose the correct option : (10 × 1 = 10)
- (i) The first stage of construction is
- (a) Preparation of estimate
 - (b) Survey of the site
 - (c) Initiation of proposal
 - (d) Preparation of Tender
- (ii) For the execution of a project, a contractor is
- (a) An individual (b) A firm
 - (c) An agency (d) All the above
- (iii) The most suitable type of equipment for compaction of cohesive soil is
- (a) Smooth-wheeled rollers
 - (b) Vibratory rollers
 - (c) Sheep foot rollers
 - (d) Tampers

[Turn over

- (iv) The excavator which is most suitable for digging under water is
- (a) Drag line (b) Hoe
(c) Clam shell (d) Dipper shovel
- (v) The residential buildings are treated as
- (a) Heavy construction
(b) Light construction
(c) Industrial construction
(d) None the above
- (vi) The various activities of a project are shown in a chart of
- (a) Horizontal lines (b) Vertical lines
(c) Dots (d) Crosses
- (vii) A dummy activity is
- (a) Artificially introduced
(b) Represented by straight line
(c) Well defined activity
(d) None of the above
- (viii) Critical Path Method (CPM) is
- (a) Synthesised in concept
(b) Built of activities-oriented programme
(c) Based on time estimate
(d) All the above
- (ix) The correct event representing PERT is
- (a) Digging of foundation started
(b) Laying of concrete completed
(c) Only (a)
(d) Both (a) and (b) .

(x) In the given figure 1, the network of a project represents an activity as

Figure 1

BINA CHOWDHURY CENTRAL LIBRARY
(GIMT & GIPS)
Azara, Hatkhowapara,
Guwahati - 781017

- (a) An excavation of footing
 - (b) An excavation which starts at event No.1 and ends at event No.2
 - (c) An excavation which takes 8 units of time
 - (d) None of the above
2. (a) Describe in brief the role of construction industries. (5)
 - (b) "Construction industry sector has ample opportunities in India" Justify your answer. (5)
 - (c) Describe in brief the unique characteristics of a construction project. (5)
3. (a) List out the equipments used for handling of construction materials. Illustrate the factors behind selection of construction equipments. (3 + 4 = 7)
 - (b) What phases would you consider while managing a construction project site? Describe each of them in brief. (3 + 5 = 8)
4. (a) Explain about the system approach for managing quality in construction projects. (7)
 - (b) What is the difference between direct and indirect cost? Also discuss the factors affecting the cost variability. (3 + 5 = 8)
5. (a) Define free float, total float and independent float. Also differentiate between CPM and PERT. (3 + 4 = 7)
 - (b) Identify the critical path in the network shown in figure 2. Also determine the project completion time. (8)

Figure 2

Duration in days

6. (a) Describe the processes involved in project procurement management. (5)
- (b) The following table provides information about various activities of the given network. (10)

Activity	Normal duration (days)	Normal cost (Rs.)	Crash duration (days)	Crash cost (Rs.)
1-2	9	80000.00	6	95,000.00
2-3	5	50000.00	3	55,000.00

The project overhead costs are @ Rs 3000 per day. Determine

- (i) Direct cost-duration relationship
- (ii) Total cost-duration relationship
- (iii) Corresponding least cost plan (Network)
7. Write short notes on (Any three) : (3 × 5 = 15)
- (a) Gantt chart
- (b) Methods of underwater construction
- (c) Job safety analysis
- (d) Causes of project delay
- (e) Phase hazard analysis
